Programming Skills

- **Languages**: Java, SQL, Python,C#
- **Backend Technologies**: Spring Boot, Spring MVC, JAX-RS, REST APIs, MVC Architecture,IBM MQ,Microservices
- **Databases**: MySQL, SQL
- **Frontend**: HTML, CSS, JSP, ReactJS, React Native
- **DevOps & Tools**: Git, GitHub, GitLab, GitHub Actions, Maven, Flyway
- **Cloud & Storage**: AWS S3, Firebase
- **Domain**: ETF Order Management Systems, Financial Services, System Integration,Capital markets

Work Experience

Genpact India Pvt. Ltd. Bangalore

Java Developer *Feb 2025 – Present*

- Contributing to an enterprise ETF Order Management System used by 50+ business users, supporting order creation, approval, submission, modification, and cancellation workflows.
- Enhanced and maintained a multi-tier enterprise platform comprising a Spring Boot server, C# frontend, and Java service layer, collaborating across repositories to deliver scalable and reliable business functionality.
- Integrate enterprise applications with internal financial platforms to support end-to-end order lifecycle management and status tracking.
- Implemented database schema and data migrations using Flyway, ensuring version-controlled deployments across multiple environments.
- Designed and maintained in-memory caching solutions and developed checklist/health-check APIs to improve application performance, cache validation, and operational monitoring.
- Migrated legacy applications from Java 8 to Java 17, resolving deprecated APIs and improving maintainability and long-term supportability.
- Modernized applications by migrating from a proprietary Popcorn-based framework to Spring Framework across multiple enterprise applications.
- Contributed to GitLab-to-GitHub repository migrations and configured CI/CD pipelines using GitHub Actions based on organizational deployment blueprints.
- Supported automated notification and reporting workflows through Python-based scripts and operational tooling.
- Participated in Root Cause Analysis (RCA) activities for production incidents, identifying application, integration, and cache-related issues and implementing preventive fixes.

Internship Experience

Blockstash,C3I Hub IIT Kanpur,Kanpur

Full Stack Developer Intern *Sep 2024-Nov 2024*

- Designed and developed a secure chat application using the MERN stack to facilitate communication between law enforcement agencies (LEAs) and cryptocurrency exchanges.
- Implemented frontend dashboards and backend APIs for request management, real-time chat, and user authentication
- Conducted web scraping and token decoding to analyze cryptocurrency transactions and map suspicious activities.

Projects

E-Garage

Dr. Devpriya Soni *Jun 2023 - Jun 2024*

- Developed a standalone automobile platform integrating three ML models: Car Price Estimator, Car Maintenance Tracker, and Fuel Efficiency Estimator, providing comprehensive services for users and service centers.
- Implemented XAI (Explainable AI) to predict and explain the causes for maintenance needs in automobiles.
- Designed and developed the frontend using HTML and CSS, creating an intuitive and user-friendly interface.

FlySmart

Apr 2025 - Jun 2025

- Developed a full-stack flight management and booking system with role-based access for Owner, Manager, and Customer, enabling secure and segmented control.
- Built two separate dashboards for Flight Managers and Business Owners, and a booking interface for end users to streamline administrative and customer-facing operations.
- Implemented backend with Java, Spring Boot, and MySQL, featuring modular service layers and Spring MVC architecture.
- Created a dynamic frontend using JSP for seamless user interaction and content rendering.

Education

Institution	Degree	Date
Jaypee Institute of Information Technology, Noida	B.Tech in Computer Science	2020 – 2024
